

## Photos and Videos for the Web

Some of you from time to time make videos or photographs of RCPC events. If you have any videos you would like to share on our website, we have our own YouTube account, and also have the capability of uploading videos to Facebook. Videos need to be less than 10 minutes in length. Because these files tend to be large, the best way to get them to me is on a CD, which can be put in the box in the office labeled with my name.

If you have a Facebook account, you might choose to upload the video yourself. Copy the “embed” information and/or the URL for the video and email it to [rcpcweb@gmail.com](mailto:rcpcweb@gmail.com)

This is also true of still photos, particularly if they are high resolution. If you only have a few photos, or if they are small, you can email those directly to me.

I can open and convert video files in the following formats: avi, wmv, mov (Apple Quick Time). The best format for still pictures is “.jpg

Except for the “mov” files, you can convert your own video files using Windows Movie Maker. You might even wish to edit your own videos...just remember to keep them under 10 minutes or 1GB.

MAC users....I don't have a clue, but I am sure you do!
